

## Care and Maintenance

Congratulations on your new Palm City Ironworks Product. All Palm City products are guaranteed with a manufacturer's warranty available on our website. **In accordance with our product warranty, proper care and maintenance is required.**

All Products come with a very durable finish, however, like with any high-quality product, there are some recommended practices for maintenance.

For Palm City products to perform at the highest level, proper cleaning and maintenance is necessary. We recommend that all product is inspected and cleaned monthly. For a proper clean, please use the following process:

1. **A mild soap and water mixture are recommended. (Avoid using chlorine or ammonia-based cleaners as these WILL damage the door finish.)** Warm water is recommended but not necessary.
2. **Gently starting from the top to the bottom, take a low lint cloth and wash your door with the soap solution until dirt is removed. Please ensure to be gentle as you do not want to scratch the finish coat with any abrasive dirt.**
3. **Upon completion of the soapy wipe down, rinse with clean water. Please rinse thoroughly, to remove any soapy residue. This residue can discolor the finish over time. Do not rinse with a high-pressure washer.**
4. **Once the product is completely clean, gently dry with a low lint cloth.**

Frequent and thorough inspections are necessary to maintain your Palm City products. For any further questions regarding care and maintenance, contact your local dealer.
